EJL Wireless Research adds the Ericsson GSMW-CDMA RUS 900MHz RF Module to its Design Analysis Infrastructure (DNA-I) series of teardown reports

Salem, NH, November 7, 2011: EJL Wireless Research is announcing a new report within its proprietary DNA-I series, an Ericsson GSM/W-CDMA 900MHz 60W RUS unit.

“This is our first opportunity to look into the design philosophy for Ericsson’s latest generation RBS6000 BTS platform and has allowed us to see design changes from the prior generation RBS3000. The RUS is of particular importance as it is the multi-standard radio architecture version of their RF modules that supports GSM, W-CDMA and LTE technologies” said founder and President, Earl Lum.

EJL Wireless Research continues to lead the wireless market research segment with innovative and cutting edge research such as its DNA-I series of products.

“We continue to be excited in having the opportunity to showcase the latest generation remote radio units, RF transceiver modules, BTS antennas, femtocells and base stations from major wireless equipment OEMs as part of our DNA-I program,” says Lum.

The following semiconductor & passive component suppliers are included in this report: Analog Device, Altera, Anaren Microwave, Coilcraft, Fairchild Semiconductor, Freescale Semiconductor, Hittite Microwave, M/A-COM, Maxim Integrated Products, Micron Technology, National Semiconductor, Nippon Chemi-Con, Nichion, RF Microdevices, Sanyo Electric, Skyworks Solutions, STMicroelectronics, TDK-Epcos, Texas Instruments, TriQuint Semiconductors, Vishay and Xilinx.

The report is currently available for purchase and information can be downloaded at www.ejlwireless.com.

About EJM Wireless Research

EJM Wireless Research provides proprietary, accurate and cutting-edge market analysis and consulting services on the wireless technology ecosystem and defense and aerospace industries. The firm's wireless infrastructure research division focuses on all vertical elements of the wireless ecosystem including mobile subscribers, mobile operators, mobile handsets, mobile infrastructure and mobile content. In addition, the firm provides analysis across horizontal technology suppliers including RF semiconductor materials, RF semiconductor/components, subsystems and OEMs. Similarly, the defense and aerospace division focuses its efforts on the ecosystem supporting UAV and airborne platforms and subsystems. Our goal is to provide our clients with mission critical market analysis and information.

EJM Wireless Research believes it has a corporate responsibility, both local and international, in giving back to the community. Please visit our website for more information about the charitable organizations it supports at: www.ejmwireless.com/corporate_responsibility.html.

EJM Wireless Research is managed by Earl Lum. Mr. Lum has 18 years of experience within the wireless industry including 8 years as an Equity Research Analyst on Wall Street covering the global wireless industry. The company is headquartered in Salem, NH. For more information about EJM Wireless Research, please visit the company's websites at www.ejmwireless.com or www.ejmdefense.com.
