EJL Wireless Research Launches New Corporate Website and Updated Weblog Site

New website allows for better customer experience

Salem, NH, February 16, 2010: EJL Wireless Research has re-launched its corporate website to provide existing and new clients a more simplified on-line experience and to allow them to search for and find the right wireless research for their needs. "With the ever growing topics that our clients are asking for in wireless market research reports, coupled with the launch of an array of new products in 2009 and soon to be launched in 2010, it was time to update the corporate website to better highlight our positioning with the new products and services," says founder and President, Earl Lum. The website address remains the same as before at www.ejlwireless.com.

In addition, EJL Wireless Research has also updated its Weblog site, <http://ejlwireless.wordpress.com/> and will be posting on a more frequent basis comments about the wireless industry. "The blog allows us to make real time insightful comments and analysis on issues and topics that do not fall into the traditional market research category of large market share and 5-year forecast types of reports, says Lum.

Now, with a complete portfolio of wireless base station equipment research products ranging from wireless OEM financial analysis and global BTS contracts to point-to-point microwave radios and base station antennas, EJL Wireless Research continues to lead the market research industry as a single source for wireless research and analysis.

About EJM Wireless Research

EJM Wireless Research provides proprietary, accurate and cutting-edge market analysis and consulting services on the wireless technology ecosystem. The firm focuses its research on all vertical elements of the wireless ecosystem including mobile subscribers, mobile operators, mobile handsets, mobile infrastructure and mobile content. In addition, the firm provides analysis across horizontal technology suppliers including RF semiconductor materials, RF semiconductor/components, subsystems and OEMs. Our goal is to provide our clients with mission critical market analysis and information.

EJM Wireless Research is managed by Earl Lum. Mr. Lum has 18 years of experience within the wireless industry including 8 years as an Equity Research Analyst on Wall Street covering the global wireless industry. The company is headquartered in Salem, New Hampshire, USA. For more information about EJM Wireless Research, please visit the company's website at www.ejmwireless.com.
