EJL Wireless Research Reports 1H 2010 Global PTP Radio Shipments Weak Due to India

Ericsson Regains Market Leadership, 50-900Mb High Capacity Radios Capture 68% Market Share

Salem, NH, November 19, 2010: The global point to point (PTP) radio market is tracking below current 2010 estimates, according to the latest report from EJL Wireless Research titled "Global Digital PTP Radio Market Analysis, 1H 2010 1st Edition." "The PTP radio market in 1H 2010 was impacted by the telecom shutdown in India in Q2 2010 and was at 42% of our overall shipment estimate for 2010," says founder and President, Earl Lum. EJL Wireless Research is predicting that 2H 2010 PTP radio shipments may recover slightly but still miss its 2010 estimate.

Ericsson was the clear market share leader in 1H 2010 shipments with NEC in second. "Huawei Technologies continued to move up in the overall rankings to third while we have added ZTE Corporation into our analysis with a ninth ranked position," says Lum.

"Weakness in both Asia Pacific and India has impacted global PTP radio shipments in 2010" says Lum. Europe was the largest region, edging out Asia Pacific, for 1H 2010 radio shipments. The 60/70/80GHz radio segment is trending strongly with BridgeWave Communications continuing to lead this emerging product segment in 1H 2010.

The report provides a unique perspective on the global shipments and demand for PTP radio equipment covering all major vendors including Alcatel-Lucent, Aviat Networks, BridgeWave Communications, Ceragon Networks, DragonWave, E-Band Communications, Ericsson, Huawei Technologies, NEC, Nera Networks, Nokia Siemens Networks, SIAE Microelettronica and ZTE.

About EJM Wireless Research

EJM Wireless Research provides proprietary, accurate and cutting-edge market analysis and consulting services on the wireless technology ecosystem. The firm focuses its research on all vertical elements of the wireless ecosystem including mobile subscribers, mobile operators, mobile handsets, mobile infrastructure and mobile content. In addition, the firm provides analysis across horizontal technology suppliers including RF semiconductor materials, RF semiconductor/components, subsystems and OEMs. Our goal is to provide our clients with mission critical market analysis and information.

EJM Wireless Research is managed by Earl Lum. Mr. Lum has 18 years of experience within the wireless industry including 8 years as an Equity Research Analyst on Wall Street cover the global wireless industry. The company is headquartered in Salem, NH. For more information about EJM Wireless Research, please visit the company's website at www.ejmwireless.com.
