**EJL Wireless Research Reports Global Wireless Infrastructure Revenues Declined 22.4% YoY in Q1 2009 to USD \$9.8 Billion**

**Economic uncertainty continues as revenues dropped 32.5% sequentially in a seasonally weak Q1**

Redwood City, CA, June 1, 2009: The global wireless BTS infrastructure market revenues declined by 22.4% for the first quarter of 2009 to USD \$9.8 billion compared with the first quarter of 2008, according to the latest report from EJL Wireless Research titled "*Global Wireless OEM Financial Results Q1 2009*."

"While we expected a seasonally weak Q1, revenues were off by 32.5% from Q4 which is indicative of the continued economic uncertainty within the wireless sector," says founder and President, Earl Lum. ZTE was the only company that did not decline substantially in Q1 from Q4 levels while Nortel was down 60.6% due to the continued uncertainty on the emergence of the company from bankruptcy protection. The report provides a unique perspective on the global wireless infrastructure revenues for major wireless OEMs including Alcatel-Lucent, Ericsson, Motorola, Nokia Siemens Networks, Nortel Networks, and ZTE.

"Given how weak Q1 was, it is possible that the wireless infrastructure market may drop 15-20% in revenues in 2009, even with 3G growth in China and India," says Lum. As Huawei Technologies remains the only company not represented in this financial analysis, we believe that the results offer a realistic snapshot for the industry on how the overall market is progressing for 2009.

The report is currently available for purchase and information can be downloaded at [www.ejlwireless.com](http://www.ejlwireless.com).

### **About EJM Wireless Research**

EJM Wireless Research provides proprietary, accurate and cutting-edge market analysis and consulting services on the wireless technology ecosystem. The firm focuses its research on all vertical elements of the wireless ecosystem including mobile subscribers, mobile operators, mobile handsets, mobile infrastructure and mobile content. In addition, the firm provides analysis across horizontal technology suppliers including RF semiconductor materials, RF semiconductor/components, subsystems and OEMs. Our goal is to provide our clients with mission critical market analysis and information.

EJM Wireless Research is managed by Earl Lum. Mr. Lum has 17 years of experience within the wireless industry including 8 years as an Equity Research Analyst on Wall Street covering the global wireless industry. The company is headquartered in Redwood City, CA USA. For more information about EJM Wireless Research, please visit the company's website at [www.ejmwireless.com](http://www.ejmwireless.com).
